We always test ride your bike after completing any work on it. This ensures that the bike is working to a very good standard and running smoothly and quietly.

We can fix any problem that may arise on your bike, please just pop in to ask if you have any questions.

We work with all suppliers of suspension forks and shocks and can organise full services of these components, once again please ask.

Please pop into any of our stores with your bike and we can advise which level of servicing is the most appropriate and book an appointment with you.
